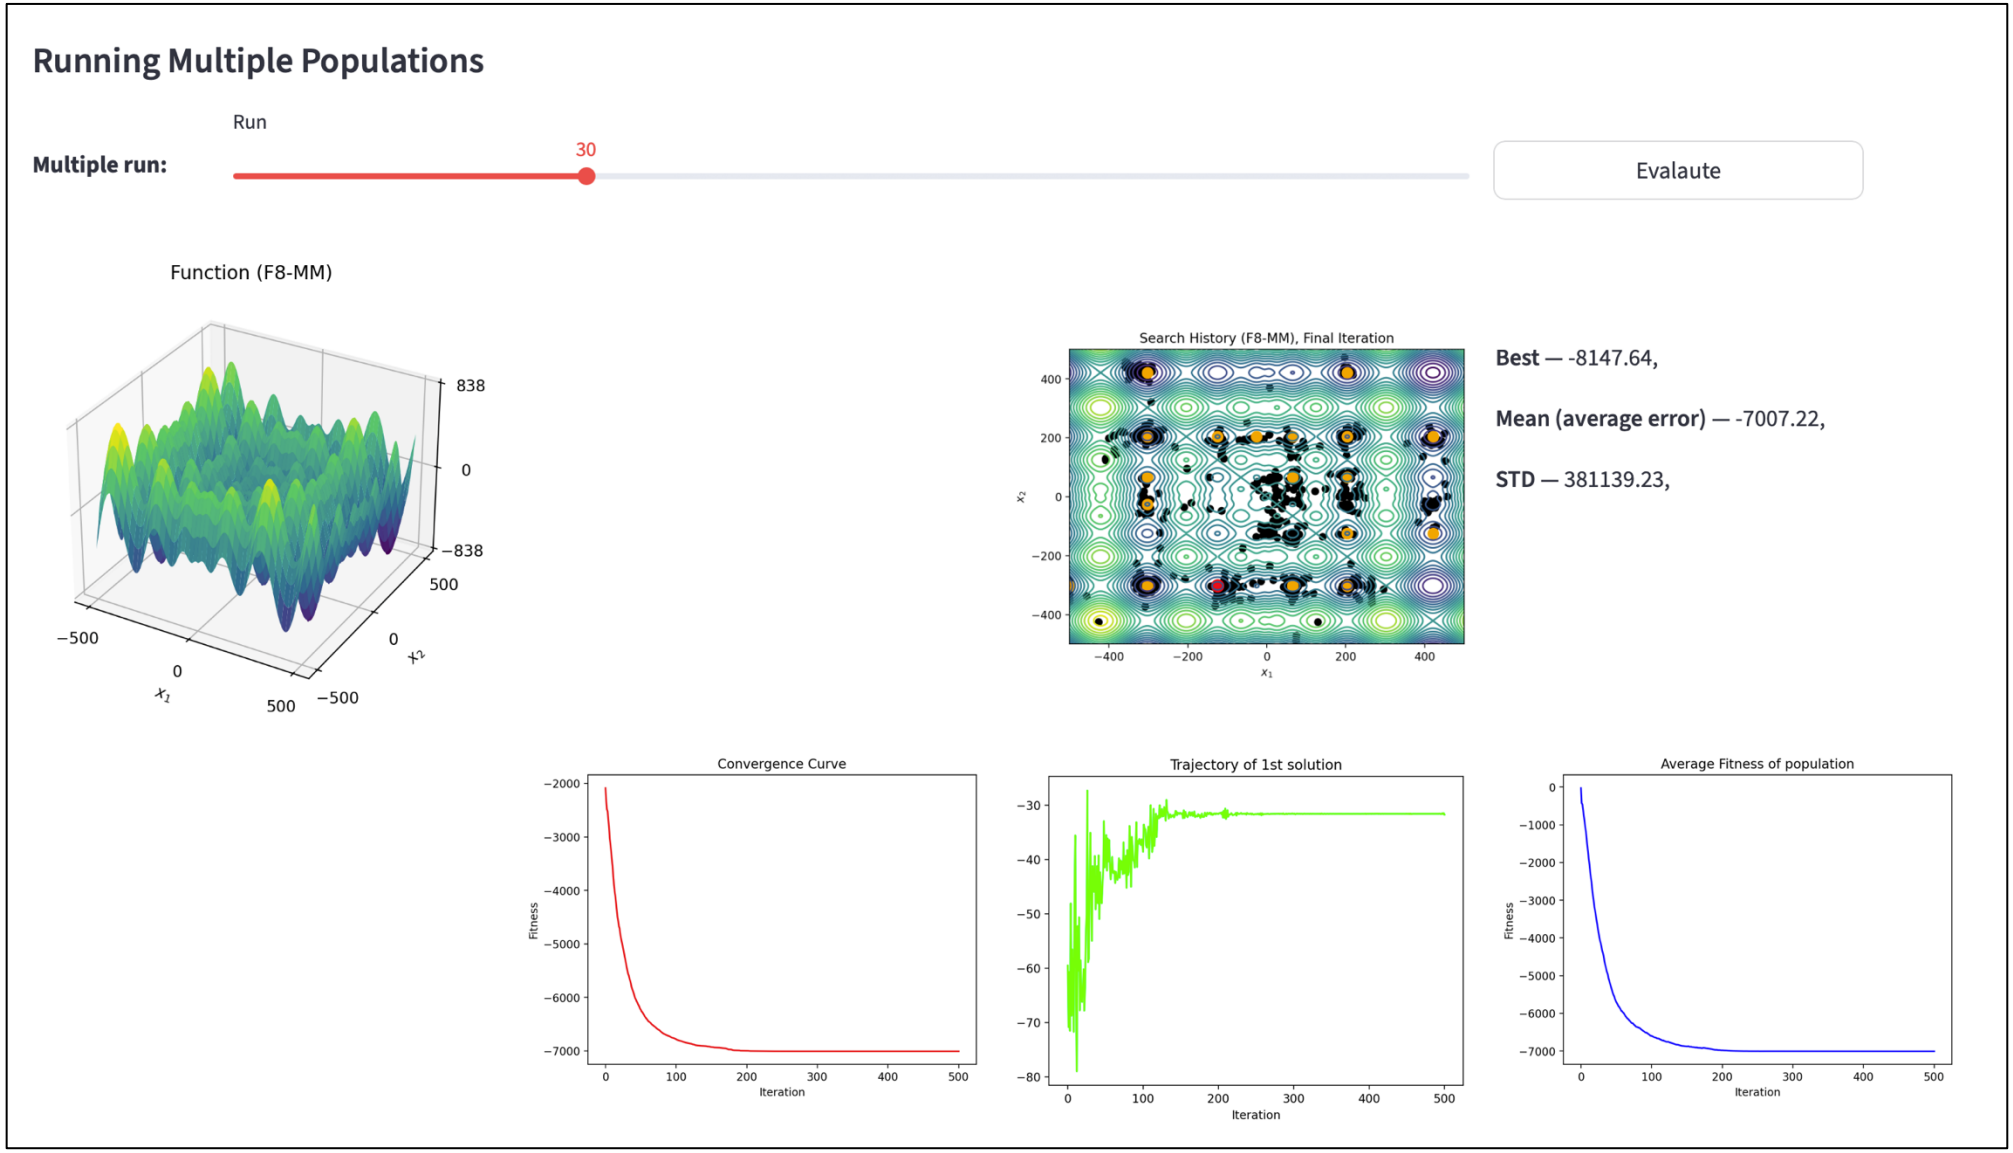
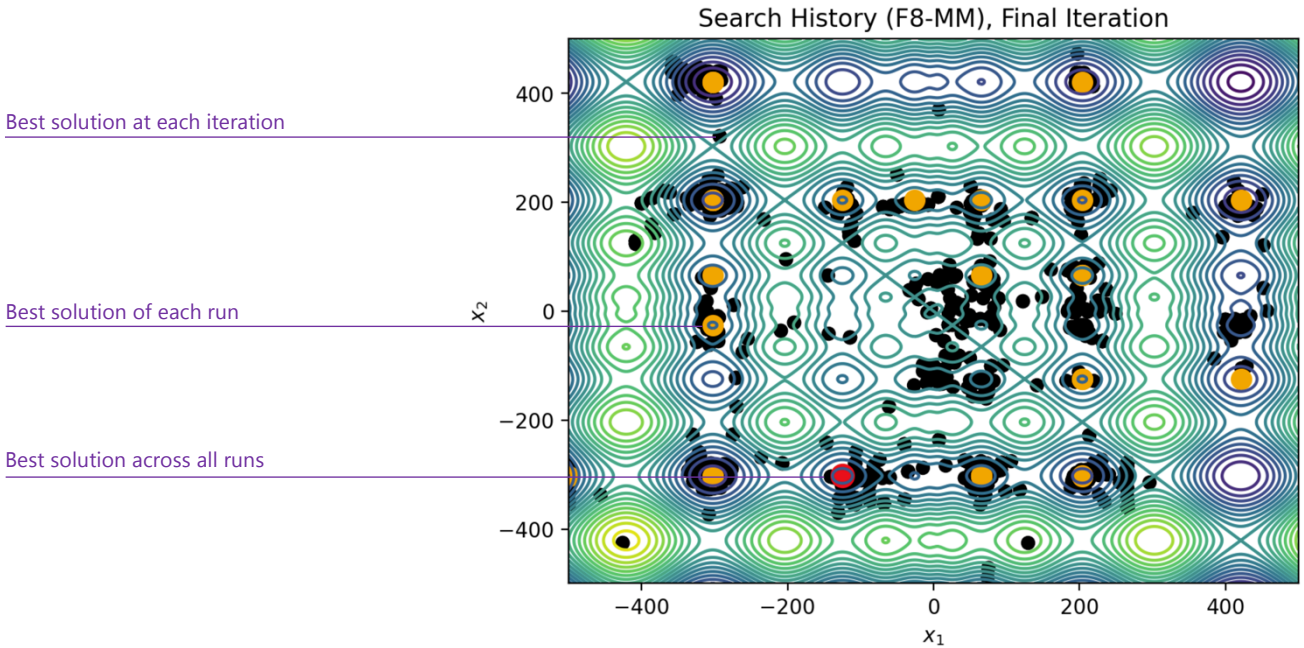
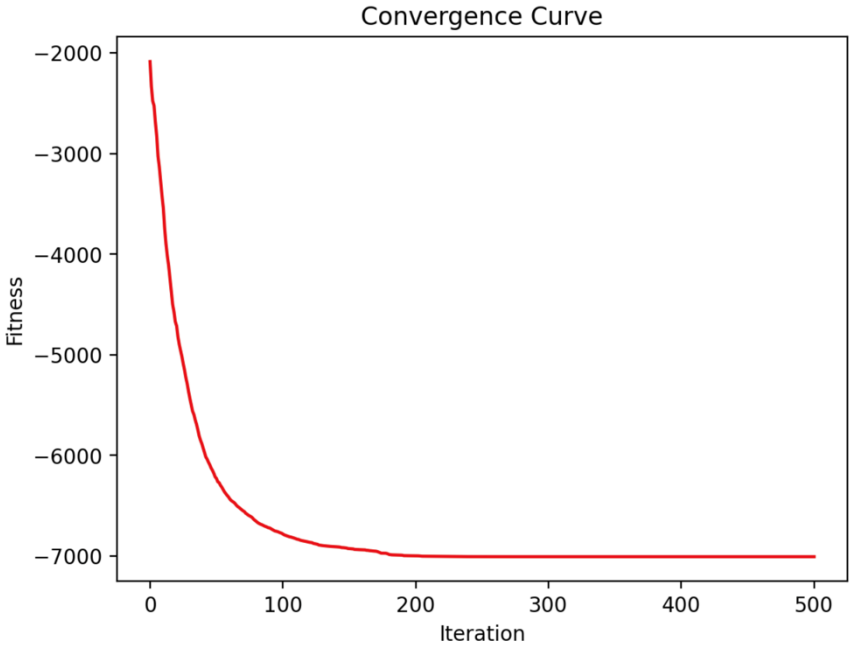
I. Running Multiple PSO Experiments

Running PSO with multiple populations



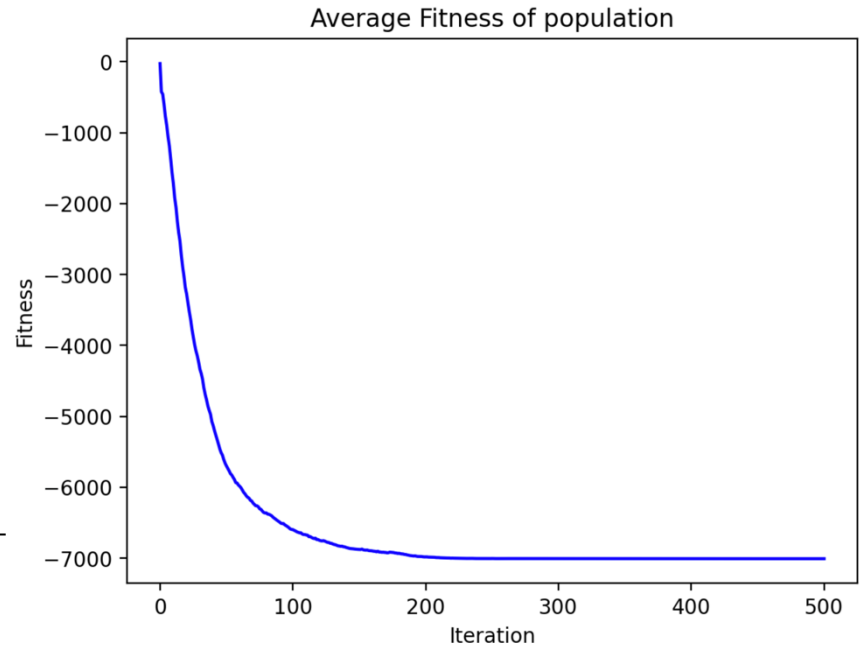


Best Solution Position Updates



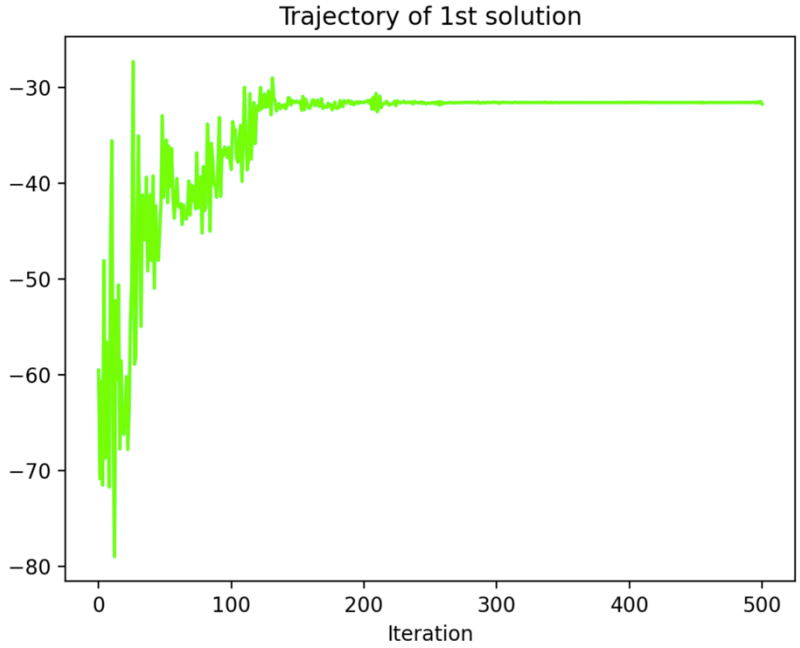
Convergence Curve

Mean Best Fitness of All Runs vs. Iteration



Average Population Fitness

Mean Population Average Fitness of All Runs vs. Iteration



Trajectory of the First Solution in the Population

Mean $x_1^{(1)}$ of all Runs vs. Iteration

Results

Best — -8147.64,

Mean (average error) — -7007.22,

STD — 381139.23,
